CORE STACK

Vue 3 Nuxt 4 TypeScript
React Next.js FastAPI
Python Node.js
PostgreSQL 17 Prisma
Tailwind CSS GSAP Figma

KEY SKILLS

- Full-Cycle Engineering
- Relational Data Architecture
- High-Fidelity UI/UX Design
- Performance & SEO Optimization
- Type-Safe REST API Engineering

PROFILE DOSSIER // CURRICULUM VITAE

Mateo Gabriel Sonzogni

Frontend & Full Stack Developer · Creative Developer

I build software with sharp design judgment and end-to-end product vision: what challenge it solves, how it should look and feel, how it gets architected, and how it reaches production. I don't position myself merely as a coder or designer; I operate right where technical infrastructure meets human experience.

01 PROFESSIONAL EXPERIENCE & PROJECTS

Team Degree Thesis · Lead Contributor (382 commits)

2026

Ynara — Adaptive AI Assistant with Vector Memory

Pre-approved degree thesis at Da Vinci School. On-premise assistant featuring local inference, embeddings, and relational knowledge graph over PostgreSQL + pgvector. Led frontend development in Next.js and backend pipeline in FastAPI.

FastAPI Next.js PostgreSQL Python TypeScript

Freelance · Web Design & Engineering

2026

La Rúcula Gastrobar (Cádiz, Spain)

Menu-first web app for restaurant dining via table-side QR codes. Integrated with proprietary Pegasuz CMS and local cache fallback. Lighthouse 99 Performance and 100 SEO scores. In production.

Vue 3 Vite Tailwind CSS GSAP Lenis

Freelance · Custom Frontend & Backend

2026

ARG Piscinas (Andalucía, Spain)

Multilingual corporate web platform with dedicated admin dashboard for autonomous project management and blog. End-to-end type safety with Prisma and Node.js.

Vue 3 Node.js Prisma Tailwind

Founder & Developer

2024 – Present

Pegasuz — Proprietary Multi-Tenant CMS

API-first headless content infrastructure powering production client platforms with bulletproof data contracts.

02 EDUCATION & DEGREES

2024 – 2026 (Class of 2026)

Web Design & Development

Escuela Da Vinci · Buenos Aires

UI/UX, typography, digital art direction, reactive frontend patterns, client-server architectures, and relational databases. Pre-approved thesis: Ynara.

2017 – 2023 (Graduated)

Computer Programming Technician

CET N.º 30 · Río Negro

7-year technical education covering algorithms, data structures, low-level logic, networking, and software engineering methodologies.

03 CAREER OBJECTIVE

Consolidate my impact as an engineer within a high-caliber team shipping large-scale production software. In the medium term, technical leadership: coordinating, organizing, and bridging disciplines across product, UI/UX, frontend, and backend architectures.
